

JIGO NGOZI OGBONNAYA

Cloud & DevOps Engineer

Nigeria (Open to Remote, Contract & Freelance) | ngoziijigo2016@gmail.com | [linkedin.com/in/ngozi-jigo-b4abbb405](https://www.linkedin.com/in/ngozi-jigo-b4abbb405) | github.com/Ngy-jigo | 09047345230

PROFESSIONAL SUMMARY

Certified Cloud/DevOps practitioner with hands-on experience building and documenting practical projects across AWS, Linux, Terraform, Git/GitHub, Docker, and CI/CD. Skilled in cloud infrastructure provisioning, Linux automation, infrastructure as code (IaC), web deployment, and technical troubleshooting. Combines a background in technology education, structured problem-solving, and computer hardware diagnostics with a focus on automation, reliable cloud infrastructure, and remote technical execution.

CORE TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, Security Groups, IAM), Cloud Architecture
DevOps & Automation: Git, GitHub, GitHub CLI, Bash/Shell Scripting, Docker, Docker Compose, Jenkins, CI/CD
Web & Deployment: HTML5, CSS3, JavaScript, Bootstrap, GitHub Pages, Netlify

Infrastructure as Code: Terraform, AWS Provider, IaC Best Practices
Systems & Networking: Linux Administration, CLI, User Management, Networking, Systems Troubleshooting
Technical Support: Hardware Repair, Diagnostic Maintenance, System Assembly

KEY CLOUD & DEVOPS PROJECTS

Secure & Scalable Web Infrastructure

AWS | Terraform

Technologies: AWS (EC2, S3, Security Groups), Terraform, Ubuntu, EBS

- Provisioned an e-commerce-oriented AWS infrastructure using Terraform IaC workflows.
- Configured an Ubuntu EC2 instance, attached EBS storage, and applied security group firewalls.

Configured S3 bucket storage for hosting web asset pipelines and practiced full resource lifecycle management.

GitHub: github.com/Ngy-jigo/terraform-project

Elite Corp User Automation

Linux | Bash

Technologies: Linux CLI, Bash Scripting, Git, GitHub CLI

- Built an automated Bash workflow for batch provisioning Linux user accounts from a input list.
- Integrated continuous execution logging to audit success and error handles during process runs. Utilized Git/GitHub and GitHub CLI for programmatic submission and continuous code tracking.

GitHub: github.com/Ngy-jigo/elite-corp-user-automation

Docker & CI/CD Pipeline Infrastructure

Docker | Jenkins

Technologies: Docker, Docker Compose, Docker Hub, Jenkins, CI/CD

- Executed hands-on containerization labs creating custom Dockerfiles, images, and isolated
 - containers.
 -
- Architected multi-container services with Docker Compose and managed image pushing via Docker Hub.
- Configured foundational Jenkins automation jobs to practice automated testing and deployment pipelines.

WEB DEVELOPMENT & DEPLOYMENT PROJECTS

Jigo Surgical Foundation

HTML/CSS/JS | [GitHub Pages](#)

- Built a responsive public-interest web platform highlighting free surgical care and medical outreach.
- Implemented front-end interfaces with HTML, CSS, JavaScript, and Bootstrap; published live on GitHub Pages.

Live: ngy-jigo.github.io/JigoSurgicalFoundation | GitHub: github.com/Ngy-jigo/JigoSurgicalFoundation

Chuka Birthday Web Application

JavaScript | [Netlify](#)

- Created a customized interactive web application with dynamic styling and version-controlled
- updates via Git. Configured continuous deployment pipelines linked directly to Netlify hosting.

Live: jolly-sprinkles-6d74d7.netlify.app | GitHub: github.com/Ngy-jigo/chuka-birthday-site

PROFESSIONAL EXPERIENCE

Technology Educator (Part-Time)

2026 – Present

[J-Click Smart Technologies Limited](#)

- Instruct primary and secondary school students in programming, robotics, and fundamental
- technology concepts. Develop interactive learning modules that cultivate logical problem-solving and digital skills.

Biology Teacher

2020 – 2026

[Secondary Education](#)

- Delivered structured scientific education to senior secondary students, translating complex ideas into
- clear concepts.

Fostered analytical thinking, systematic observations, and scientific inquiry through structured coursework.

Computer Hardware Repair & Maintenance Trainee

Excel Mega Computers, Aba

Completed

- Performed hardware diagnostics, component replacements, physical maintenance, and
- troubleshooting on systems.

Established low-level systems knowledge that supports cloud server architecture and infrastructure support.

EDUCATION & CERTIFICATIONS

Certified DevOps & Cloud Computing Practitioner ThriveAbia under Qurate HQ — Hands-on mastery of AWS, Linux, Terraform, Docker & CI/CD	2026
B.Sc. Biology Education Michael Okpara University of Agriculture, Umudike	2022
Additional Credentials TRCN Certified (Teachers Registration Council of Nigeria) NYSC Discharge Certificate (2024)	

PROFESSIONAL STRENGTHS & CAREER TARGET

Strengths: Cloud & DevOps Implementation • Linux & CLI Troubleshooting • Infrastructure as Code • Technical Documentation • Problem Solving & Analytical Thinking • Remote Collaboration.

Career Target: Open to Cloud Engineer, DevOps Engineer, AWS Cloud Engineer, Cloud Support, Infrastructure & Automation roles (Strong preference for Remote, Contract, or Full-Time opportunities).
